

HELP PREVENT THE SPREAD OF RESPIRATORY VIRUSES LIKE COVID-19 AND FLU

Cleanpen™ eliminates bacteria and common viruses as you pass a pen through it. One pass and your pen is clean and safe! Super Fast & Simple.

Cleanpen can be mounted to any clean, smooth surface such as a desk, monitor, whiteboard or clipboard—Using Cleanpen in shared work areas and public access points helps to create a cleaner, healthier environment for all of your customers and employees.

For the millions of businesses that process point of sale transactions at electronic card readers, just attach Cleanpen to the reader.

Allow your customers to sign for their purchases and input pin numbers without risking infection.

2,400 germs on a pen!

Cleanpen is a pen holder and pen sanitizer.
Eliminates bacteria and common viruses.
Effective, safe, and simple to use.

How long do refills last?

While the unit itself is designed for many years of use, the sponge refill should last approximately two weeks, and sometimes longer, depending on use.

When should I refill a Cleanpen?

It's time to refill when you can no longer see a very fine film of fluid coating a pen after passing it through the unit. Solution can be added to extend use.

How do I refill a Cleanpen?

1. Unsnap the top half of the unit.
2. Remove the sponge from the shell.
3. Insert a fresh sponge refill.
4. Snap the top and bottom halves together. That's It!

Can I get the refills sent to me automatically?

Yes. Upon request, Diamond will send you refills on a scheduled basis to ensure that you always have Cleanpen refills available to use.

Does the Cleanint solution contain alcohol? Yes and

No There are two options for solution. Alcohol based (CDC Recommended) and a BTK version. The BTK version will not discolor the instrument.

Is it safe?

Yes. Cleanint's unique cleaning solution is safe for everyone, including children and women who are pregnant.

What size pen fits?

Fits most pens up to 14mm diameter.
Notch provides additional clearance for clips.
